

Cambridge AS & A Level Mathematics — Topics and Subtopics

Syllabus 9709 · Papers 1 to 6 · complete index of topics and subtopics

458 subtopics — PURE MATHEMATICS 1 118 · PURE MATHEMATICS 2 AND 3 140 · MECHANICS 55 · PROBABILITY AND STATISTICS 1 78 · PROBABILITY AND STATISTICS 2 67

PAPER 1 — PURE MATHEMATICS 1

1.1 Quadratics

- 1.1.1 Completing the square
- 1.1.2 Vertex of a parabola
- 1.1.3 Line of symmetry
- 1.1.4 Maximum and minimum value of a quadratic
- 1.1.5 Sketching the graph of a quadratic
- 1.1.6 The discriminant $b^2 - 4ac$
- 1.1.7 Condition for two distinct real roots
- 1.1.8 Condition for a repeated root
- 1.1.9 Condition for no real roots
- 1.1.10 Solving a quadratic by factorising
- 1.1.11 Solving a quadratic by the formula
- 1.1.12 Solving a quadratic by completing the square
- 1.1.13 Solving quadratic inequalities
- 1.1.14 Equations reducible to quadratic form
- 1.1.15 Simultaneous equations — one linear, one quadratic
- 1.1.16 Intersection of a line and a curve
- 1.1.17 Condition for tangency

1.2 Functions

- 1.2.1 Definition of a function
- 1.2.2 Domain
- 1.2.3 Range
- 1.2.4 Function notation
- 1.2.5 One-one functions
- 1.2.6 Restricting a domain to make a function one-one
- 1.2.7 Composite functions
- 1.2.8 Domain and range of a composite function
- 1.2.9 Inverse functions
- 1.2.10 Condition for an inverse to exist
- 1.2.11 Finding an inverse algebraically
- 1.2.12 Domain and range of an inverse
- 1.2.13 Graph of $y = f^{-1}(x)$ as a reflection in $y = x$
- 1.2.14 Translation of a graph
- 1.2.15 Reflection of a graph in the axes
- 1.2.16 Stretch of a graph
- 1.2.17 Combinations of transformations
- 1.2.18 Describing a transformation from its equation

1.3 Coordinate geometry

- 1.3.1 Length of a line segment
- 1.3.2 Midpoint of a line segment
- 1.3.3 Gradient of a line
- 1.3.4 Equation of a line, $y - y_1 = m(x - x_1)$

- 1.3.5 Equation of a line, $ax + by + c = 0$
- 1.3.6 Parallel lines
- 1.3.7 Perpendicular lines
- 1.3.8 Point of intersection of two lines
- 1.3.9 Equation of a circle, $(x - a)^2 + (y - b)^2 = r^2$
- 1.3.10 General equation of a circle
- 1.3.11 Centre and radius of a circle
- 1.3.12 Intersection of a line and a circle
- 1.3.13 Tangent to a circle
- 1.3.14 Perpendicularity of a radius and a tangent
- 1.3.15 Graphs and their associated equations
- 1.3.16 Points of intersection as solutions of equations

1.4 Circular measure

- 1.4.1 The radian
- 1.4.2 Degrees to radians
- 1.4.3 Radians to degrees
- 1.4.4 Arc length $s = r\theta$
- 1.4.5 Area of a sector $A = \frac{1}{2}r^2\theta$
- 1.4.6 Area of a segment
- 1.4.7 Perimeter of a sector and a segment
- 1.4.8 Exact answers in terms of π
- 1.4.9 Problems combining arcs, sectors and triangles

1.5 Trigonometry

- 1.5.1 Sine, cosine and tangent of any angle
- 1.5.2 Exact values for 30° , 45° and 60°
- 1.5.3 Exact values in radians
- 1.5.4 Graph of $y = \sin x$
- 1.5.5 Graph of $y = \cos x$
- 1.5.6 Graph of $y = \tan x$
- 1.5.7 Amplitude
- 1.5.8 Period
- 1.5.9 Transformations of trigonometric graphs
- 1.5.10 Identity $\tan \theta = \sin \theta / \cos \theta$
- 1.5.11 Identity $\sin^2 \theta + \cos^2 \theta = 1$
- 1.5.12 Proving trigonometric identities
- 1.5.13 Principal and related angles
- 1.5.14 Solving trigonometric equations in a given interval
- 1.5.15 Equations quadratic in a trigonometric function
- 1.5.16 Equations of the form $\sin(ax + b) = k$

1.6 Series

- 1.6.1 Binomial expansion of $(a + b)^n$ for positive integer n
- 1.6.2 Pascal's triangle
- 1.6.3 Binomial coefficients and nCr notation
- 1.6.4 Factorial notation
- 1.6.5 Finding a particular term of an expansion
- 1.6.6 Finding a coefficient of an expansion
- 1.6.7 Sequences and notation for terms
- 1.6.8 Sigma notation
- 1.6.9 Arithmetic progression — n th term
- 1.6.10 Arithmetic progression — sum of n terms
- 1.6.11 Geometric progression — n th term
- 1.6.12 Geometric progression — sum of n terms
- 1.6.13 Convergence and the condition $|r| < 1$
- 1.6.14 Sum to infinity of a geometric progression
- 1.6.15 Problems combining arithmetic and geometric progressions

1.7 Differentiation

- 1.7.1 Gradient of a curve as a limit
- 1.7.2 Notation $f'(x)$, dy/dx , $f''(x)$, d^2y/dx^2
- 1.7.3 Derivative of x^n
- 1.7.4 Derivative of a constant multiple
- 1.7.5 Derivative of a sum

- 1.7.6 The chain rule
- 1.7.7 Gradient of a tangent
- 1.7.8 Equation of a tangent
- 1.7.9 Equation of a normal
- 1.7.10 Increasing and decreasing functions
- 1.7.11 Stationary points
- 1.7.12 Nature of a stationary point by the first derivative
- 1.7.13 Nature of a stationary point by the second derivative
- 1.7.14 Maximum and minimum problems
- 1.7.15 Connected rates of change

1.8 Integration

- 1.8.1 Integration as the reverse of differentiation
- 1.8.2 Integral of x^n for $n \neq -1$
- 1.8.3 Integral of $(ax + b)^n$
- 1.8.4 The arbitrary constant
- 1.8.5 Finding a curve from its gradient function
- 1.8.6 Definite integration
- 1.8.7 Area under a curve
- 1.8.8 Area of a region below the x -axis
- 1.8.9 Area between a curve and a line
- 1.8.10 Area between two curves
- 1.8.11 Volume of revolution about the x -axis
- 1.8.12 Volume of revolution about the y -axis

PAPERS 2 AND 3 — PURE MATHEMATICS 2 AND 3

2.1 Algebra

- 2.1.1 The modulus of a number
- 2.1.2 The modulus function
- 2.1.3 Graph of $y = |ax + b|$
- 2.1.4 Solving equations with a modulus
- 2.1.5 Solving inequalities with a modulus
- 2.1.6 Use of the relation $|a| = |b| \Leftrightarrow a^2 = b^2$
- 2.1.7 Division of a polynomial by a linear divisor
- 2.1.8 Division of a polynomial by a quadratic divisor
- 2.1.9 Quotient and remainder
- 2.1.10 The remainder theorem
- 2.1.11 The factor theorem
- 2.1.12 Factorising a cubic or quartic polynomial
- 2.1.13 Solving a polynomial equation
- 2.1.14 Partial fractions with distinct linear factors
- 2.1.15 Partial fractions with a repeated linear factor
- 2.1.16 Partial fractions with an irreducible quadratic factor
- 2.1.17 Partial fractions for an improper fraction
- 2.1.18 Binomial expansion of $(1 + x)^n$ for rational n
- 2.1.19 Binomial expansion of $(a + bx)^n$ for rational n
- 2.1.20 Condition of validity for a binomial expansion
- 2.1.21 Binomial expansion combined with partial fractions

2.2 Logarithmic and exponential functions

- 2.2.1 Definition of a logarithm
- 2.2.2 Laws of logarithms
- 2.2.3 Logarithm of a product and a quotient
- 2.2.4 Logarithm of a power
- 2.2.5 The natural logarithm
- 2.2.6 The exponential function e^x
- 2.2.7 e^x and $\ln x$ as inverse functions
- 2.2.8 Graph of $y = e^x$
- 2.2.9 Graph of $y = \ln x$
- 2.2.10 Solving equations of the form $a^x = b$
- 2.2.11 Solving equations involving logarithms
- 2.2.12 Solving inequalities involving logarithms
- 2.2.13 Reduction to linear form for $y = kx^n$
- 2.2.14 Reduction to linear form for $y = k \cdot a^x$
- 2.2.15 Finding constants from a straight-line graph

2.3 Trigonometry

- 2.3.1 Secant, cosecant and cotangent
- 2.3.2 Graphs of sec, cosec and cot
- 2.3.3 Identity $1 + \tan^2\theta = \sec^2\theta$
- 2.3.4 Identity $1 + \cot^2\theta = \operatorname{cosec}^2\theta$
- 2.3.5 Addition formula for $\sin(A \pm B)$
- 2.3.6 Addition formula for $\cos(A \pm B)$
- 2.3.7 Addition formula for $\tan(A \pm B)$
- 2.3.8 Double angle formula for $\sin 2A$
- 2.3.9 Double angle formula for $\cos 2A$
- 2.3.10 Double angle formula for $\tan 2A$
- 2.3.11 Expression of $a \sin \theta + b \cos \theta$ as $R \sin(\theta \pm \alpha)$
- 2.3.12 Expression of $a \sin \theta + b \cos \theta$ as $R \cos(\theta \pm \alpha)$
- 2.3.13 Maximum and minimum values from the R form

- 2.3.14 Solving equations using the R form
- 2.3.15 Proving trigonometric identities
- 2.3.16 Solving equations using the addition and double angle formulae

2.4 Differentiation

- 2.4.1 Derivative of e^x
- 2.4.2 Derivative of $e^{(ax+b)}$
- 2.4.3 Derivative of $\ln x$
- 2.4.4 Derivative of $\sin x$, $\cos x$ and $\tan x$
- 2.4.5 Derivative of $\tan^{-1}x$
- 2.4.6 The product rule
- 2.4.7 The quotient rule
- 2.4.8 Implicit differentiation
- 2.4.9 Tangents and normals to an implicit curve
- 2.4.10 Parametric differentiation
- 2.4.11 Tangents and normals to a parametric curve
- 2.4.12 Stationary points of the new function types
- 2.4.13 Connected rates of change

2.5 Integration

- 2.5.1 Integral of $e^{(ax+b)}$
- 2.5.2 Integral of $1/(ax + b)$
- 2.5.3 Integral of $\sin(ax + b)$ and $\cos(ax + b)$
- 2.5.4 Integral of $\sec^2(ax + b)$
- 2.5.5 Integral of $1/(x^2 + a^2)$
- 2.5.6 Integration of $kf'(x)/f(x)$
- 2.5.7 Integration using trigonometric identities
- 2.5.8 Integration by substitution
- 2.5.9 Changing the limits in a definite integral
- 2.5.10 Integration by parts
- 2.5.11 Repeated integration by parts
- 2.5.12 Integration using partial fractions
- 2.5.13 Definite integrals with the above methods
- 2.5.14 Area under a curve using the above methods
- 2.5.15 The trapezium rule
- 2.5.16 Over-estimate and under-estimate with the trapezium rule
- 2.5.17 Improving an estimate by increasing the number of intervals

2.6 Numerical solution of equations

- 2.6.1 Locating a root by a change of sign
- 2.6.2 Locating a root graphically
- 2.6.3 Rearranging an equation into the form $x = F(x)$
- 2.6.4 The iterative formula $x_{(n+1)} = F(x_{(n)})$
- 2.6.5 Convergence of an iteration
- 2.6.6 Divergence of an iteration
- 2.6.7 Staircase and cobweb diagrams
- 2.6.8 Accuracy of a root to a given number of decimal places

2.7 Vectors

- 2.7.1 Vector notation
- 2.7.2 Position vectors
- 2.7.3 Displacement vectors

- 2.7.4 Components in i, j, k form
- 2.7.5 Column vector form
- 2.7.6 Magnitude of a vector
- 2.7.7 Unit vectors
- 2.7.8 Addition and subtraction of vectors
- 2.7.9 Multiplication by a scalar
- 2.7.10 Parallel vectors
- 2.7.11 The scalar (dot) product
- 2.7.12 Angle between two vectors
- 2.7.13 Condition for perpendicular vectors
- 2.7.14 Vector equation of a line
- 2.7.15 Determining whether two lines are parallel
- 2.7.16 Determining whether two lines intersect
- 2.7.17 Point of intersection of two lines
- 2.7.18 Skew lines
- 2.7.19 Angle between two lines

2.8 Differential equations

- 2.8.1 Formulating a differential equation from a rate of change
- 2.8.2 Separating the variables
- 2.8.3 General solution
- 2.8.4 Particular solution from an initial condition
- 2.8.5 Use of partial fractions when integrating
- 2.8.6 Finding the value of a constant from given data
- 2.8.7 Interpreting the solution in context
- 2.8.8 Sketching a member of the family of solution curves

- 2.8.9 Behaviour of the solution for large values of the variable

2.9 Complex numbers

- 2.9.1 The imaginary unit i
- 2.9.2 Real and imaginary parts
- 2.9.3 Addition and subtraction
- 2.9.4 Multiplication
- 2.9.5 Division by the conjugate
- 2.9.6 The complex conjugate
- 2.9.7 Square roots of a negative number
- 2.9.8 Solving a quadratic with complex roots
- 2.9.9 Conjugate pairs as roots of a real polynomial
- 2.9.10 Equating real and imaginary parts
- 2.9.11 The Argand diagram
- 2.9.12 Modulus of a complex number
- 2.9.13 Argument of a complex number
- 2.9.14 Modulus-argument (polar) form
- 2.9.15 Exponential form $re^{i\theta}$
- 2.9.16 Multiplication in polar form
- 2.9.17 Division in polar form
- 2.9.18 Geometrical effect of multiplication and division
- 2.9.19 Locus $|z - a| = r$
- 2.9.20 Locus $|z - a| = |z - b|$
- 2.9.21 Locus $\arg(z - a) = \theta$
- 2.9.22 Regions defined by inequalities on the Argand diagram

PAPER 4 — MECHANICS

4.1 Forces and equilibrium

- 4.1.1 Force as a vector
- 4.1.2 Resultant of two or more forces
- 4.1.3 Resolving a force into components
- 4.1.4 Equilibrium of a particle
- 4.1.5 Three forces in equilibrium
- 4.1.6 Triangle of forces
- 4.1.7 Weight
- 4.1.8 Normal contact force
- 4.1.9 Tension and thrust
- 4.1.10 Friction
- 4.1.11 Coefficient of friction
- 4.1.12 Limiting friction $F = \mu R$
- 4.1.13 Smooth and rough contact
- 4.1.14 Equilibrium on a horizontal plane
- 4.1.15 Equilibrium on an inclined plane

4.2 Kinematics of motion in a straight line

- 4.2.1 Displacement, velocity and acceleration
- 4.2.2 Distance and speed
- 4.2.3 Displacement–time graphs
- 4.2.4 Velocity–time graphs
- 4.2.5 Gradient of a displacement–time graph
- 4.2.6 Gradient of a velocity–time graph
- 4.2.7 Area under a velocity–time graph
- 4.2.8 Constant acceleration formulae
- 4.2.9 Deriving the constant acceleration formulae
- 4.2.10 Vertical motion under gravity
- 4.2.11 Variable acceleration
- 4.2.12 Velocity as the derivative of displacement
- 4.2.13 Acceleration as the derivative of velocity
- 4.2.14 Displacement as the integral of velocity

- 4.2.15 Velocity as the integral of acceleration

4.3 Momentum

- 4.3.1 Linear momentum
- 4.3.2 Conservation of linear momentum
- 4.3.3 Direct collision of two particles
- 4.3.4 Particles that coalesce
- 4.3.5 Change of momentum

4.4 Newton's laws of motion

- 4.4.1 Newton's first law
- 4.4.2 Newton's second law, $F = ma$
- 4.4.3 Newton's third law
- 4.4.4 Motion on a horizontal plane
- 4.4.5 Motion on an inclined plane
- 4.4.6 Motion with friction
- 4.4.7 Connected particles
- 4.4.8 Particles connected by a string over a pulley
- 4.4.9 Motion in a lift
- 4.4.10 Resistance to motion

4.5 Energy, work and power

- 4.5.1 Work done by a constant force
- 4.5.2 Work done by a force at an angle
- 4.5.3 Work done against gravity
- 4.5.4 Work done against friction
- 4.5.5 Kinetic energy
- 4.5.6 Gravitational potential energy
- 4.5.7 Conservation of mechanical energy
- 4.5.8 The work–energy principle
- 4.5.9 Power as the rate of doing work
- 4.5.10 Power of a moving vehicle, $P = Fv$

PAPER 5 — PROBABILITY AND STATISTICS 1

5.1 Representation of data

- 5.1.1 Discrete and continuous data
- 5.1.2 Stem-and-leaf diagrams
- 5.1.3 Back-to-back stem-and-leaf diagrams
- 5.1.4 Box-and-whisker plots
- 5.1.5 Histograms
- 5.1.6 Frequency density and unequal class widths
- 5.1.7 Cumulative frequency graphs
- 5.1.8 Median
- 5.1.9 Quartiles
- 5.1.10 Percentiles
- 5.1.11 Interquartile range
- 5.1.12 Range
- 5.1.13 Mean
- 5.1.14 Mode and modal class
- 5.1.15 Variance
- 5.1.16 Standard deviation
- 5.1.17 Use of Σx and Σx^2
- 5.1.18 Calculations from grouped data
- 5.1.19 Coded data
- 5.1.20 Outliers
- 5.1.21 Comparing two distributions
- 5.1.22 Choosing an appropriate measure of average and spread

5.2 Permutations and combinations

- 5.2.1 The addition and multiplication principles of counting
- 5.2.2 Factorial notation
- 5.2.3 Permutations of n distinct objects
- 5.2.4 Permutations of r objects from n
- 5.2.5 Permutations with repeated objects
- 5.2.6 Arrangements with restrictions
- 5.2.7 Arrangements where objects must be together
- 5.2.8 Arrangements where objects must be separated
- 5.2.9 Combinations
- 5.2.10 Selections of r objects from n
- 5.2.11 Selections with restrictions
- 5.2.12 Using permutations and combinations to find a probability

5.3 Probability

- 5.3.1 Sample space
- 5.3.2 Equally likely outcomes
- 5.3.3 Probability of an event

- 5.3.4 Complementary events
- 5.3.5 Mutually exclusive events
- 5.3.6 The addition rule
- 5.3.7 Independent events
- 5.3.8 The multiplication rule
- 5.3.9 Conditional probability
- 5.3.10 The formula $P(A|B) = P(A \cap B)/P(B)$
- 5.3.11 Testing for independence
- 5.3.12 Tree diagrams
- 5.3.13 Venn diagrams
- 5.3.14 Two-way tables
- 5.3.15 Problems combining several methods

5.4 Discrete random variables

- 5.4.1 Discrete random variable
- 5.4.2 Probability distribution table
- 5.4.3 Condition $\Sigma p = 1$
- 5.4.4 Expectation $E(X)$
- 5.4.5 Variance $\text{Var}(X)$
- 5.4.6 Use of $E(X^2) - [E(X)]^2$
- 5.4.7 The binomial distribution
- 5.4.8 Conditions for a binomial model
- 5.4.9 Binomial probabilities
- 5.4.10 Mean of a binomial distribution
- 5.4.11 Variance of a binomial distribution
- 5.4.12 The geometric distribution
- 5.4.13 Conditions for a geometric model
- 5.4.14 Geometric probabilities
- 5.4.15 Mean of a geometric distribution

5.5 The normal distribution

- 5.5.1 The normal distribution $N(\mu, \sigma^2)$
- 5.5.2 Properties of the normal curve
- 5.5.3 Symmetry about the mean
- 5.5.4 The standard normal variable Z
- 5.5.5 Standardising, $Z = (X - \mu)/\sigma$
- 5.5.6 Use of the standard normal table
- 5.5.7 Finding a probability from a value
- 5.5.8 Finding a value from a probability
- 5.5.9 Finding an unknown mean
- 5.5.10 Finding an unknown standard deviation
- 5.5.11 Finding both μ and σ from two probabilities
- 5.5.12 Normal approximation to the binomial distribution
- 5.5.13 Conditions for the normal approximation
- 5.5.14 The continuity correction

PAPER 6 — PROBABILITY AND STATISTICS 2

6.1 The Poisson distribution

- 6.1.1 The Poisson distribution $Po(\lambda)$
- 6.1.2 Conditions for a Poisson model
- 6.1.3 Calculating Poisson probabilities
- 6.1.4 Mean of a Poisson distribution
- 6.1.5 Variance of a Poisson distribution
- 6.1.6 Poisson distribution over a changed interval
- 6.1.7 Sum of independent Poisson variables
- 6.1.8 Poisson approximation to the binomial distribution
- 6.1.9 Conditions for the Poisson approximation
- 6.1.10 Normal approximation to the Poisson distribution
- 6.1.11 Conditions for the normal approximation
- 6.1.12 Continuity correction with the approximations

6.2 Linear combinations of random variables

- 6.2.1 $E(aX + b)$
- 6.2.2 $Var(aX + b)$
- 6.2.3 $E(aX + bY)$ for independent X and Y
- 6.2.4 $Var(aX + bY)$ for independent X and Y
- 6.2.5 Sum of n independent observations of X
- 6.2.6 Distinction between $2X$ and $X_1 + X_2$
- 6.2.7 Linear combination of independent normal variables
- 6.2.8 Difference of two independent normal variables
- 6.2.9 Linear combinations of Poisson variables

6.3 Continuous random variables

- 6.3.1 Continuous random variable
- 6.3.2 Probability density function
- 6.3.3 Conditions for a probability density function
- 6.3.4 Probability as the area under the curve
- 6.3.5 Finding an unknown constant in a pdf
- 6.3.6 Expectation $E(X)$
- 6.3.7 Expectation $E(g(X))$
- 6.3.8 Variance $Var(X)$
- 6.3.9 Median of a continuous random variable
- 6.3.10 Quartiles and percentiles
- 6.3.11 The cumulative distribution function
- 6.3.12 Obtaining the cdf from the pdf

- 6.3.13 Obtaining the pdf from the cdf
- 6.3.14 Using the cdf to find probabilities

6.4 Sampling and estimation

- 6.4.1 Population and sample
- 6.4.2 Random sampling
- 6.4.3 Methods of sampling
- 6.4.4 Advantages and limitations of sampling
- 6.4.5 The sample mean as a random variable
- 6.4.6 Distribution of the sample mean
- 6.4.7 Mean and variance of the sample mean
- 6.4.8 The central limit theorem
- 6.4.9 Unbiased estimate of a population mean
- 6.4.10 Unbiased estimate of a population variance
- 6.4.11 Confidence interval for a population mean, known variance
- 6.4.12 Confidence interval using the central limit theorem
- 6.4.13 Confidence interval for a population proportion
- 6.4.14 Width of a confidence interval
- 6.4.15 Interpretation of a confidence interval

6.5 Hypothesis tests

- 6.5.1 Null hypothesis
- 6.5.2 Alternative hypothesis
- 6.5.3 One-tailed and two-tailed tests
- 6.5.4 Significance level
- 6.5.5 Test statistic
- 6.5.6 Critical value
- 6.5.7 Critical region
- 6.5.8 Acceptance and rejection of the null hypothesis
- 6.5.9 Stating a conclusion in context
- 6.5.10 Type I error
- 6.5.11 Type II error
- 6.5.12 Probability of a Type I error
- 6.5.13 Probability of a Type II error
- 6.5.14 Hypothesis test for a binomial proportion
- 6.5.15 Hypothesis test for a Poisson mean
- 6.5.16 Hypothesis test for a population mean with known variance
- 6.5.17 Hypothesis test using the central limit theorem
